IMPORTANT HANGING INSTRUCTIONS

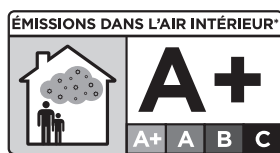

The Japan Collection is a Gravure printed non-woven wallpaper, but with an additional layer of gloss lacquer which gives it a truly unique and luxurious finish. Therefore extra care should be taken not to crease the substrate during handling.

CROSS LINE YOUR WALLS

For the best installation results and to achieve the desired polished affect, we recommend that you lightly rub down and cross line your walls to make sure the surface is as smooth as possible in order to alleviate any blemishes or bumps before hanging.

This is a paste the wall product, however pasting the paper rather than, or as well as the wall will make the wallcovering more flexible. On darker colourways you can paint under any joins before the paper is hung in case they open up. Also a sharp crayon could be used to disguise the join in the paper if this is still visible.

As with all papers remove all of the paste after the paper is hung and dry the surface of the wallcovering to help to give a more even finish.
